Most Businesses Don't Have a Growth Problem. They Have a Systems Problem.

⚠️ Fragmented Operations Cause:

- ❌ **Lead Leakage**
Unqualified leads slipping through the cracks
- ❌ **Operational Chaos**
Disconnected processes and workflows
- ❌ **Disconnected Platforms**
Siloed systems not talking to each other
- ❌ **Revenue Blind Spots**
No visibility into key metrics

✅ ORIGENNT Solves:

- ✅ **Structural Clarity**
Unified systems architecture
- ✅ **Automation Orchestration**
Streamlined workflows
- ✅ **Operational Visibility**
Real-time monitoring & analytics
- ✅ **Data-Driven Execution**
Evidence-based decision making

The ORIGENNT Control Layer

The structural logic behind modern enterprises — engineering scalable business infrastructure.

I. Operations Architecture

- Workflow standardization and system-driven execution
- Platform alignment and process automation
- Operational visibility and data-driven execution
- Cross-platform integration and optimization

II. Workforce Strategy

- Role engineering and talent infrastructure
- Hiring systems and performance frameworks
- Workforce planning and optimization
- Skills development and training programs

III. Execution Enablement

- Code deployment and infrastructure activation
- Analytics instrumentation and monitoring
- API integrations and automation
- Performance scaling and optimization

The ORIGENNT Methodology

Diagnose → Design → Enable → Optimize

1

Diagnose

Operational audits, workflow mapping, leakage tracing

- System analysis
- Process mapping
- Leakage identification

2

Design

Custom architecture blueprints and automation frameworks

- Architecture planning
- Framework design
- Automation setup

3

Enable

Technical deployment, API integrations, infrastructure activation

- Technical deployment
- API integration
- Infrastructure setup

4

Optimize

Telemetry analysis, monitoring, performance scaling

- Performance analysis
- Monitoring setup
- Scaling optimization

Digital Infrastructure Tiers

Structured for every scale of business — from early-stage to enterprise.

Enterprise Maintenance Plan

₹14,999/mo

Custom Infrastructure for High-Growth Companies.

Enterprise-grade solutions engineered for scale and performance.

SaaS Platforms

Scalable software-as-a-service solutions with multi-tenant architecture

Marketplaces

Multi-vendor marketplace platforms with advanced vendor management

ERP Integrations

Enterprise resource planning with real-time data synchronization

CRM Systems

Customer relationship management with automation workflows

Subscription Platforms

Recurring billing systems with subscription management

AI Ecosystems

Intelligent automation with machine learning capabilities

Starting Estimates

Solution Type	Starting Price	Timeline
SaaS Platforms	₹2,20,000+	8–12 weeks
Headless E-Commerce	₹3,80,000+	10–14 weeks
Membership Systems	₹3,00,000+	6–8 weeks
Marketplaces	₹12,50,000+	12–16 weeks

Enterprise Governance

Enterprise-Grade Security

- ✓ Weekly strategy calls
- ✓ SLA-backed support
- ✓ Dedicated execution teams
- ✓ Real-time monitoring

AI Automation Ecosystem

The Automation Layer Behind Scalable Businesses.
